eCAMMS UPDATES

Current System Status - There are currently no known issues.

Please note, Google Chrome is the recommended browser for eCAMMS and your first transaction of the day takes longer than subsequent transactions due to the system refreshing and loading cache. If you are making administrative changes to eCAMMS, it is also important to note that to accommodate the performance enhancements deployed with Release 14.2, system cache times have increased from every 20 minutes to once per hour.

eCAMMS Release 17 was successfully deployed on Monday, October 29. For full information on this release please see What's New (Tools - About).

When setting up a sample to which a Special Provision applies, check the Special Provisions checkbox and then begin typing any part of the Special Provision name in the dropdown box:
eCAMMS UPDATES

• Administrative Functions
  – JMF Revision Restrictions
  – JMF Validation Requirements – New Column Name Options
  – JMF Ingridient Validation Requirements

• TR-447 changes
  – Sampled by and Inspected by e-mail validation

• ESB Changes
  – Added PO Number to results on Find Plnt Summ Shipment

• Sample Changes
  – Post-Finalization Comment required
eCAMMS UPDATES

- Advanced Search – New Filter “Sample ID”
- Added Contractor Code and Supplier Code to Client Report Search Results
- Added Material Code/Class, Supplier Code, ECMS#, SR#, and Section to Client Report e-mail Notifications
- Re-calculate Pop-up Message for 408 Spec Change
- Section 419 Revisions
