

PennDOT Multiple Stress Creep Recovery

- 2015 PAPA Regional Meeting

▶ PennDOT Multiple Stress Creep Recovery

- PennDOT will replace PG 76-22 with PG64E-22 in Bulletin 25 and follow M 322 for PG 64E-22 only
- No other PG binders in Bulletin 25 will use MSCR grading (M 322)

▶ PennDOT Multiple Stress Creep Recovery

- Producers will be notified when PG 64E-22 is permitted
- During the transition period, PennDOT will allow the use of PG64E-22 where PG 76-22 has been previously specified
- When PG 64E-22 is specified, PG 76-22 will not be allowed as a substitute.

▶ PennDOT Multiple Stress Creep Recovery

- Testing has shown that most PG 76-22 asphalt binders will meet the PG 64E-22 specifications
- There are no indications at this time that TSR testing will need redone when changing the PG binder in your mix designs from PG 76-22 to PG 64E-22
